

AN OVERVIEW ON NEW PRODUCT DEVELOPMENT ZONE

New product development (**NPD**) is the overall process of conceptualizing, designing, planning, and commercializing a new product in an effort to bring it to market. Renewing an old product and launching a new product into a new market are also considered aspects of product development. The design of products is a key component of NPD. Realizing a market opportunity by putting a product on the market is also known as new product development. A quality management system (**QMS**) is essential for qualifying, marketing, and preserving safe and efficient products. A QMS offers a structure for recording the procedures required to create, develop, and produce high-quality goods. By systematically identifying and fixing potential defects and inefficiencies, the QMS helps to reduce errors and enhance product reliability. A strong QMS is essential for companies looking to stay ahead of the competition. It maintains the company's reputation for quality in the marketplace in addition to ensuring product excellence.

AIM

- To design and develop new product
- Providing basic idea of product development
- To upbringing an entrepreneurial culture among students
- Promote startup ideas in the field of food technology
- To familiarize current market scenario

OBJECTIVE

- To develop products focusing on satisfying second sustainable development goal proposed by UN
- Innovating product formulation with locally available goods
- Emphasizing on creating products with least waste (both biodegradable and non-biodegradable)
- Producing varieties of byproducts
- Encouraging students to come up with recipes with cultural significance

LAYOUT

REQUIREMENTS

- Sealing machine
- Oven
- Knife- 4
- Cutting board
- Refrigerator
- Dehydrator
- Stove (2 burner)
- Gas cylinder
- Mixer juicer
- Mixing bowls steel (big)- 6
- Mixing bowls steel (small)- 4
- Tongs- 2
- Silicone mold (cutlery shape)
- Butter paper
- Aluminium foil
- Jug
- Juice glass
- Turning table
- Palette knife
- Measuring cups
- Electric beater
- Spoon- 4
- Brush
- Spatula
- Steel Kadai (Big)- 2
- Steel tray
- Ladle- 3
- Stainer
- Whisk
- Non-stick Kadai

BUDGET ESTIMATION

● Sealing machine	= 1377
● Oven (60L)	= 10699
● Knife- 4	= 764
● Cutting board	= 259
● Refrigerator	= 21990
● Dehydrator	= 4899
● Stove (2 burner)	= 2999
● Gas cylinder	= 900
● Mixer juicer	= 2799
● Mixing bowls steel (big)- 6	= 2430
● Mixing bowls steel (small)- 4	= 449
● Tongs- 2	= 420
● Silicone mold (cutlery shape)	= 298
● Butter paper	= 269
● Aluminium foil	= 598
● Jug	= 229
● Juice glass	= 1500
● Turning table	= 699
● Palette knife	= 199
● Measuring cups	= 795
● Electric beater	= 1349
● Spoon- 4	= 299
● Brush	= 100
● Spatula	= 189
● Steel Kadai (Big)- 2	= 4908
● Steel tray (4)	= 5560
● Ladle- 3	= 389
● Strainer	= 299
● Whisk	= 130
● Non-stick Kadai	= 2795

Total budget estimated= ₹ 70590
